The Pre-Stock system will let a dealership pre-stock vehicles. The Pre-Stock option will mark the vehicle with a Pre-Stock message of the dealers choosing. In this case it is "Coming Soon". It can also show an ETA message for the vehicle. In this case it is the ETA date and in a red font. The font color can be selected when entering the ETA message.

When the vehicle is changed to "Active", the Pre-Stock message and the ETA date will be removed automatically.
