

Vehicle Condition Options

Our inventory offers several vehicle Conditions, here are the available options:

All
New
Used
Specials
In-Transit
On-Order

A dealer selects the Conditions to include in their inventory.

The default is to show “All” of the selected Conditions when the inventory is displayed, but a specific Condition can be selected from the Home page or main inventory page.

In-Transit and On-Order Conditions

You may want to include In-Transit and/or On-Order vehicles in your inventory, but don't necessarily want these vehicles shown to buyers. Our system can address this issue.

By using our Dealer's Private Inventory feature, both the In-Transit and On-Order vehicles can be shown exclusively through this inventory. This lets the salespeople easily and quickly see vehicles that will soon be in the inventory, without buyers having the same access.
