

## In-Transit Badging Options

### In-Transit Badging

In-Transit vehicles can be added to the Active Inventory, providing buyers and salespeople knowledge of vehicles that are soon to be part of your Active inventory. These vehicles will include In-Transit badging and can include an Estimated Time of Arrival (ETA) date. The In-Transit badging and ETA date are automatically removed, by our inventory system, when the vehicle is included in the data feed file.
