

Search Link Builder

This feature allows you to capture a set of search options as a search link that can be sent to potential buyers. When clicked, it shows the relevant search results as it was built. The search is dynamic; what it shows today may be different next week.

As an illustration, assume you had a company that regularly buys F-350 pickups with diesel engines. They currently must go to your website and enter the same search criteria they always enter to see what is in stock. Search Link Builder changes all that. The search is only built once and is saved through Search Link Builder, this link can then easily be emailed to your buyer. They can save the link or bookmark it. This allows them to instantly see what you have in stock at any given time.
