

## Inventory Search Options

### Common Search Options

Our inventory offers many inventory search options.

#### Search Options

All  New Only  Used Only  Specials Only

#### Category

#### Make

#### Stock#

Find

#### Model

#### Fuel

#### Drive

#### Cab/ Body

Search

Clear/Show All

This is a hierarchical search. For instance, if you select the Category “Service Trucks”, then the only Makes that will show up to be selected are those with Service Trucks. If you then select a Make, say Ford, then the only Models that will show up under Models are Ford’s with Service Bodies, and so on.

### VIN and Specification Search Options

Body Code Lookup:

Search

VIN Last Eight Lookup:

Year Code Lookup:

Search

These represent available advanced search options. The drop-down boxes beside the option will only contain options that are in the active inventory. If you can’t find something you are looking for it is because it is not in the inventory. The Body Code, VIN Lookup, Engine Code and Year Code, are all based on the VIN. The Wheelbase and Cab to Axle options are from the available inventory.

### Feature Search Options

One of the more valuable search options is our Feature Search. These represent features that the dealer selects as important search options. For instance, features like Gaseous Prep, PTO, Body Companies, Hydraulic Outriggers, ... These options can be searched individually or combined.
