

## Truck Type Search Options

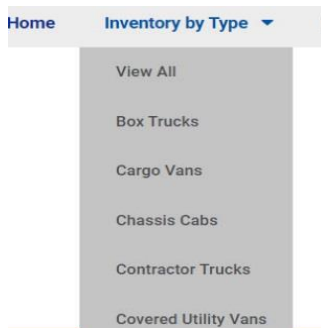

**AVAILABLE TRUCK TYPES** - The dealer decides what truck types to include for their inventory search. The truck types available are unlimited. They can even represent an industry or service sector. The truck types can be changed as needed.

Many upfit trucks can easily fit into more than one truck type. Our inventory system lets you include a vehicle in as many truck types as you deem relevant.

### SEARCH TYPES

**Image Search** - An image can be used for the truck type search. The image can be any image, because the truck type search might be for an industry or service sector or body company, .... The image can be represented on any website page, even third-party websites.

**Drop Down Menu Search** - One of the most common search types for websites is the Drop-Down menu. The example to the left is for truck types, but we also offer Drop-Down menus for Industry or service sector type, Body Companies, condition, .... Like most of our searches, they can be represented on any website page, even third-party websites.

**Main Inventory Page Image Search** – We also offer an image search for the main inventory page. The search options to include, along with the images to use are decided by the dealer.
